Meticulous Care

Unique Facilities

Comprehensive Stocks

A Modernized 91-Year Old Pharmacy

One Pharmacist checks the work of another.

Comprehensive stocks assure prompt service.

Registered pharmacists in the Eimer and Amend prescription laboratory have one and only one duty—to compound prescriptions according to the latest approved methods of pharmacy and in keeping with the professional standards of medicine.

Large and comprehensive stocks of drugs, pharmaceuticals and biologicals are available to physicians and their patients through Eimer and Amend Apothecary. Hundreds of different prescription ingredients not carried in stock by the usual drug store are on hand for immediate use. Physicians are invited to inspect this professional prescription laboratory and to avail themselves of its facilities.

ARGYROL NO CILIARY INJURY

FOR SAFE ANTISEPSIS PLUS DECONGESTION

IT HAS BEEN pointed out by many authors that the "ciliary sweep" plays an important role in throwing off upper respiratory infections. Thus a mucous membrane antiseptic which injures the cilia is defeating its own end. ARGYROL produces *no* ciliary injury. This is one reason why, in over 40 years of world-wide use, ARGYROL has established a remarkable record of effectiveness and safety in ridding the mucous membranes of infection. *Other important reasons are:*

No Systemic Toxicity: No case of systemic toxicity due to ARGYROL has ever been noted—and this despite the fact that it has been instilled into cavities as the sinuses, the bladder, and the renal pelvis where it might be unsafe to employ some of the toxic metal solutions.

Decongestion Without Vasoconstriction: The continued use of vasoconstrictors may lead

to sogginess and loss of tissue resiliency. ARGYROL lessens turgescence but induces no powerful artificial vasoconstriction.

Unique Physical Properties: ARGYROL is more than just a simple chemical germ-killer. It is pus-dislodging, soothing, and inflammation-dispelling. By stimulating the mucous cells it effects a "physiological washing of the mucous surface."

Controlled pH and pAg—Ultra-Fine Colloidal Dispersion. The hydrogen ion and silver ion concentrations of ARGYROL are so regulated that solutions of *any* strength from 1% to 50% are equally bland and non-irritating. This is not true of other mild silver proteins. In addition, genuine ARGYROL has a much finer colloidal dispersion and a more active Brownian movement.

A. C. BARNES COMPANY, NEW BRUNSWICK, N. J.

ANTISEPTIC EFFICIENCY PLUS

1. SOOTHING AND INFLAMMATION-DISPELLING PROPERTIES
2. NO CILIARY INJURY—NO TISSUE IRRITATION
3. NO SYSTEMIC TOXICITY
4. NO PULMONARY COMPLICATIONS
5. DECONGESTION WITHOUT VASOCONSTRICTION

BLOOD FOR THE BRAVE

Fighting men are losing blood! . . . blood which must be replaced by mothers and schoolgirls, merchants and laborers, the office boy and the business executive. Fighting men are getting blood—thousands of units collected by the Red Cross in a united effort for United Nations.

In the Lilly laboratories men and women in fleece-lined clothing work in low-temperature rooms where blood, generously donated, is reduced to plasma, frozen, and dried. Plasma is processed by Eli Lilly and Company, without profit, for exclusive use by the armed forces.

VI-SYNERAL is an excellent vitamin-mineral dietary supplement—in step with advancing nutrition research.

VI-SYNERAL is personally used and widely recommended by physicians because of its effectiveness and because it is now conceded that deficiencies in vitamins and minerals are usually multiple. We have pioneered multiple vitamin-mineral therapy since 1935.

VI-SYNERAL contains:

VITAMINS: A-B₁-B₂(G)-C-D-E-Niacinamide and B Complex factors.

MINERALS: Calcium, Phosphorus, Iron, Iodine, Manganese, Magnesium, Copper, Zinc.

... in a separate Funk-Dubin balance for each age group: (1) ADULTS, (2) INFANTS and CHILDREN—up to 6, (3) CHILDREN and ADOLESCENTS—6 to 16, (4) EXPECTANT and NURSING MOTHERS, and (5) SPECIAL GROUP (Middle-aged and Aged).

Help wanted for Women at Work...

Today, more and more women man factories, mills, offices . . . many of them unaccustomed to the strain of industrial jobs.

Result: fatigue, too frequent "rests", slowed production, "absenteeism" . . . much of it traceable to poor body mechanics.

In the *relief of certain types of workers' fatigue*, Camp Supports play an increasingly important role. For these supports are *designed along anatomical lines*; they lessen back strain and protect against sprain.

It is a matter of medical record that these supports have—for 30 years—successfully aided men and women to achieve better posture . . . hence to feel more fit . . . do more work with less fatigue.

S. H. CAMP & CO., Jackson, Mich.

World's largest manufacturers of scientific supports. Offices in New York, Chicago, Windsor, Ont., London, Eng.

An extra reason for giving infants Walker-Gordon milk

FOR YEARS Walker-Gordon Certified Milk has been considered by many physicians to be the finest milk in the world . . . both for babies and adults.

And today, when there are shortages in evaporated and certain other types of milk, more doctors than ever before are prescribing Certified for their infant feeding cases . . . *for there's no wartime shortage of Walker-Gordon!*

Walker-Gordon Certified is an almost sterile milk, and provides extra richness and an extra-high vitamin content. (For example, it has 60% more Vitamin A than many ordinary milks.) Also it's delivered *fresher* than regular milk!

And at the same price, your patients can buy WALKER-GORDON CERTIFIED-HOMOGENIZED. (This extremely pure milk has a low curd tension—it's easier to digest.)

Walker-Gordon Milks can be purchased in stores or
from milkmen.

WALKER-GORDON

"The World's Finest Milk"

The weight of massed published evidence furnishes an ideal clinical background for your use of **ERTRON** in the treatment of arthritis.

ERTRONIZE THE ARTHRITIC

To *Ertronize*, the dose is gradually increased to the limit of tolerance, or until a daily dosage of six capsules is reached. This maintenance level is continued, without interruption, until definite signs of improvement are noted.

Research on ERTRON Continues

In a number of leading universities and hospitals throughout the country, investigations of various phases of **ERTRON** therapy are in continuous progress. The studies thus far conducted over an eight-year period prove beyond doubt the value of *Ertronization* in arthritis management.

ERTRON*

ERTRON, the only high potency, activated, vaporized ergosterol (Whittier Process), is made only in the distinctive two-color gelatin capsule. **ERTRON** is promoted only through the medical profession. Complete bibliography and dosage card available upon request.

NUTRITION RESEARCH LABORATORIES
CHICAGO

GROWING UP WITH THE NATION

In 1876, the Philadelphia Centennial heralded the approach of the great industrial era. In the same city, a youthful organization was implanting its roots in the soil of American pharmacy. William Richard Warner, true to the pioneering spirit of his age, was even then evolving new and better methods of making medicinal drugs.

Over the years, the house of William R. Warner & Co., Inc. has grown until today its branches girdle the globe, in fulfillment of its early chosen motto, "Omnis Orbis." And, conscious of its obligation to play a worthy part in the progress of pharmaceutical science, the house of Warner, through its affiliated Warner Institute for Therapeutic Research, continues to pioneer in the pursuit of original investigation and research, to the end that still better, safer means may be found for the prevention and control of disease.

COME HELL AND HIGH WATER . . .

During peace times and war, good times and bad, the high standards set some 60 years ago by Braverman, for the fitting and building of shoes, still cling doggedly to its chartered course.

Today, the name Braverman, signifies an integrity and accomplishment recognized by the general public, institutions and leading doctors everywhere.

What "P40's" Mean to a Woman

OF COURSE, she knows that P40's are fighting planes. After all she helps build them. But, to her, and to many other women who are now engaged in war work, the designation may also suggest the "perilous 40's—that period of life which women often fear.

Women need no longer fear the distressing symptoms of the menopause. They can, by adequate estrogenic therapy, be kept fit—physically and emotionally. And, with their symptoms relieved, they can stay "on the job."

The high clinical effectiveness of Amniotin in relieving menopausal symptoms has been amply demonstrated by reports which have appeared during the last 13 years. Amniotin is a highly purified, non-crystalline preparation of naturally occurring estrogenic substances derived from pregnant

mare's urine. It is most economically purchased in the 10-cc. and 20-cc. vial packages which offer the additional advantage of permitting dosage flexibility without waste of material. It is also available in ampuls, capsules and pessaries.

86 PROOF

SOLE U. S. AGENTS. Schieffelin & Co.
NEW YORK CITY • IMPORTERS SINCE 1794

**KARO Red Label
and Blue Label are
equally effective
in Milk
Modification**

How much KARO for Infant Formulas?

The amount of KARO prescribed is 6 to 8% of the total quantity of milk used in the formula—one ounce of KARO in the newborn's formula is gradually increased to two ounces at six months.

CORN PRODUCTS REFINING CO. • 17 Battery Place, New York, N. Y.

The chemical compositions and caloric values of these two types of KARO are practically identical.

Therefore the slight difference in flavor (hardly noticeable in the milk mixture) in no way affects the value of KARO as a milk modifier.

Either type may be prescribed for prematures, newborns and infants.

MEAD JOHNSON & CO.
EVANSVILLE, IND., U. S. A.

*"I'm saying this
for Uncle Sam!"*

"I speak for the pleasant, happy things in life . . . all the things we necessarily now have less of. You know . . . tires, radios, gas, fuel, food, fun, leisure and all the like. In its own way, your bottle of ice-cold Coca-Cola is almost a casual symbol of such pleasant things.

"Everybody eagerly accepts wartime restrictions. We'll have the good things, again, someday. But now it's work harder and fight, too. We've got a tough war to win. And no matter what anybody is doing to help (this doesn't go for fighting men) nobody is doing his full share if he's not buying U. S. War Bonds and War Stamps regularly. Are you buying them? Are you buying your share in Victory and in the good American way of life?"

FEATURES . . .

1. Eliminates venipuncture.
Only a drop or two of blood is required. Especially valuable with small children and babies, and corpulent adults.
2. Requires no transfer of blood. The taking pipette serves also for the sedimentation.
3. Can be used with equal facility for home visits, office visits or hospital.
4. Compact unit which fits easily into doctor's bag.

**LANDAU-ADAMS MICROSEDIMENTATION APPARATUS**

The LANDAU-ADAMS Microsedimentation Apparatus (described by Albin Landau, M.D., April, 1933, American Journal of Diseases of Children, Vol. 45, No. 4, pp. 691-733) is a modification of the Linzenmeier-Raunert method and overcomes several of the difficulties with macro methods. Particularly, it eliminates venipuncture and so simplifies blood sedimentation tests that they can be taken with equal facility in the home, office or hospital.

PROCEDURE . . .

Attach suction apparatus to a pipette, draw up 5% citrate solution to the first circular mark on the pipette. Puncture the finger tip and draw up blood until the combined column reaches the second circular mark. With the suction apparatus the citrated blood is carefully mixed by bringing it up and down into the bulb. After mixing, the top of the column is brought down to the zero point on the scale. The pipette is then set into the rack. After one hour the millimeter drop is read directly from the scale on the pipette.

Same procedure can be used when the sample is taken at the bedside, in which case it can be read after remixing up to six hours after the sample was taken.
